VISION LAB PURPOSE

A lab is a place to test ideas, and our vision labs will do just that! We will test the ideas gathered from the community and refine them into goals and actions for the Hermiston 2040 vision.

VISION LAB OVERVIEW

Over the last several months, the Hermiston 2040 Committee has received thousands of comments from community members through our community outreach at events, online survey, focus groups, and more. We organized all of these comments into theme groups for the purpose of meeting in vision labs with subject-matter experts (City and community organizations) and interested community members to explore the ideas within each theme group more deeply and discuss specific actions to bring these ideas to life in the next 20 years.

OTHER VISION LABS

- **HEALTH / EDUCATION:** TUESDAY, NOV. 16 | 5:00-6:30 PM
